

BÁRBARA BITARELLO, PHD

Computational Biologist

1527 S 12th St 19147 Philadelphia | bbitarello.github.io | barbarabitarello@gmail.com | linkedin.com/in/barbara-bitarello/

SUMMARY

- Computational biologist with expertise in genomics, population genetics, statistical genetics, immunogenetics
- Strong record of collaborative work, management of research projects, and scientific writing, including 10 scientific papers and 4 successful grant proposals
- Self-motivated, problem-solving scientist, with deep understanding of next-generation sequencing and genotype data
- Experienced science communicator, with 3 talks and several poster presentations delivered to international scientific audiences
- Driven to use computational methods to gather and analyze human genetic data and advance genomic medicine

TECHNICAL SKILLS

- **Programming:** R programming, Python, Bash/shell scripting, sed/awk
- **Genomics:** GWAS, linear modelling, polygenic risk score implementation, DNA sequence simulations, ancestry inference, gene ontology analyses, functional annotation
- **Genomic Data analysis:** Biobank data analyses, frequentist statistics, biostatistics
- **Software** Plink, Ldpred, MSMS, SLiM, Microsoft Word, Overleaf, RStudio, VSCode, bcftools, Hail, Apache Spark (beginner)
- **Reproducible Research:** GitHub, R Notebooks
- **Data Visualization:** R Shiny, ggplot2
- **Languages:** English and Portuguese: native. French and Spanish: conversational.
- **Task and time management:** Quire, Slack

RESEARCH EXPERIENCE

University of Pennsylvania, Perelman School of Medicine

Postdoctoral Researcher, Department of Genetics

March 2018-present

- Led project to understand the drivers of polygenic risk prediction accuracy in admixed populations, resulting in 1 first author publication²
- Used big data from UK Biobank, 1000 Genomes, Women's Health Initiative, Health and Retirement Study and gnomAD
- Performed ancestry inference, leveraged individual genetic ancestry into polygenic risk predictions
- Performed GWAS and linear modelling of polygenic traits
- Developed tools to correct for biases, showing the determinants of loss of prediction power across different ancestries
- Delivered 3 conference talks, 1 local talk, and 1 interactive poster
- Collaborated on a project looking for the genetic determinant of reproductive success performing tests to detect balancing selection signatures, resulting in one co-authorship¹

Max Planck Institute for Evolutionary Anthropology, Leipzig, Germany

Postdoctoral Researcher, Department of Evolutionary Genetics

Oct 2016-Dec 2017

- Led and collaborated on projects to investigate signatures of balancing selection in human genomes, resulting in 2 co-authorship publications^{3,5}
- Used 1000 Genomes data, ancient genomes, R data analysis, population genetics methods

University of São Paulo, São Paulo, Brazil

Doctoral Researcher, Genetics and Evolutionary Biology Department

Aug 2011-Aug 2016

- Quantified the pervasiveness of balancing selection throughout human evolutionary history and its effects in neighboring regions in the genome, resulting in 1 first author paper⁴, 2 international conference posters, and 2 local talks
- MSMS software for balancing selection simulations, R programming and bash/linux for data analysis and visualization, ENSEMBL for genomic annotations, bcftools to analyze 1000 Genomes dataset, parallel computing in R
- Mentored 1 undergraduate student and guest lectured for 1 graduate course in genomics
- Collaborated on a project focused on assembling the genome of the kiwi, where I performed phylogenetic analyses using PAML, resulting in one co-authorship⁷
- Performed data analysis on two projects on HLA genes' diversity and mapping bias, resulting in two co-authorships^{8,9}

University of São Paulo, São Paulo, Brazil

MSc Researcher, Genetics and Evolutionary Biology Department

March 2009 to Aug 2011

- Investigated the timescale of natural selection in human HLA genes, resulting in 1 first author paper⁶ and 2 international conference poster presentations
- Phylogenetic analyses of HLA genes using PAML software, DNA sequence simulations, R programming and bash/linux to analyze and visualize the data
- Mentored one masters student working on HLA genes
- Engaged in scientific outreach resulting in 2 peer-reviewed publications in Portuguese

State University of Campinas, Campinas, Brazil

Undergraduate Researcher, Department of Genetics

Aug 2005 to Dec 2007

- Developed genetic markers for the human botfly in order to understand its diversity in Brazil, resulting in one first author publication¹⁰ and 2 conference posters
- Extracted DNA, designed primers, performed sanger sequencing, analyzed polyacrylamide gels, used statistical approaches to assess and compare genetic diversity in 2 populations

EDUCATION

- PhD, Biology (Genetics), University of São Paulo, Brazil, 2016
- MSc, Biology (Genetics), University of São Paulo, Brazil, 2011
- BS, Biological Sciences, State University of Campinas, Brazil, 2007

AWARDS

Grants

- PhD Research Grant from São Paulo Research Foundation, 2011-2016
- PhD Research Grant for visiting period at the Max Planck Institute from São Paulo Research Foundation, 2013-2013
- Master's Research Grant from São Paulo Research Foundation, 2009-2011
- Undergraduate Research Grant from São Paulo Research Foundation, 2005-2007

Prizes

- Best graduate student paper award for Genome Biology and Evolution (SMBE, 2019)
- Spotlight Trainee Paper, by the American Society of Human Genetics (ASHG, 2019)
- 1st place in for the graduate program, University of São Paulo, Department of Genetics and Evolutionary Biology (2009)

CONFERENCE PRESENTATIONS (4 OUT OF 15)

- **Bitarello, BD** Mathieson, I (2020) *Low transferability of height polygenic risk scores in admixed ancestry populations*. Contributed talk, NY Area Population Genomics, New York, NY.
- **Bitarello, BD** Mathieson, I (2019) *Investigating the lack of transferability of polygenic risk scores in cohorts with admixed ancestry*, Contributed talk at the American Society of Human Genetics Annual Meeting, Houston, TX.
- **Bitarello, BD** Mathieson, I (2019) *Polygenic risk scores perform poorly across populations*, Contributed talk at the American Society of Human Genetics Annual Meeting, San Diego, CA.
- **Bitarello, BD**; de Filippo, C; Andrés, A; Meyer, D (2015) *Balancing selection in humans: insights from a novel SFS-based method*. Poster session presented at the Annual Meeting of the Society for Molecular Biology and Evolution, Vienna, Austria.

VOLUNTEER EXPERIENCE

- Abstract and grant reviewer for The National Diversity in STEM Conference (Society for the Advancement of Chicanos/Hispanics and Native Americans in Science), 2020
- Member of Diversity Committee of Biomedical Postdoctoral Council, University of Pennsylvania, 2020
- Reviewer of scientific manuscripts for peer-reviewed journals, 2016-present
- Consultant on ancient DNA for identification of forensic skeletal remains, 2015
